

DELTA®-CLEAN DEGREASER 10

Article number: 08405708

The DELTA®-CLEAN DEGREASER 10 is an alkaline dip cleaner for boiling degreasing. The powdery, alkaline DELTA®-CLEAN DEGREASER 10 is perfectly suited to derease iron parts and steel in a dipping process. The high end ingredients allow short treatments times and guarantee a long-time use of the bath. The DELTA®-CLEAN DEGREASER 10 remove tenacious dirt in a short time. It is emulsifying and free of any complexing agents such as EDTA and NTA. It is the first cleaning step in the DELTA-PROZINC®-process. After this you pickle and degrease electrolytically. It can also be used as an alkaline degreaser for a zinc flake basecoat.

CATEGORY

electroplating

pretreatment

REQUIREMENTS

Special features

- water-based

Surface / Substrate

- steel

Application technology

dipping (drum)

dipping (drain)

Legal conditions

- meets the EU End-of-Life Vehicle Directive 2000/53/EC
- meets the RoHS 2 guidelines (also known as EU Directive on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment 2002/95/EC)
- meets the REACH requirements

Contact Person

- Christian Lenzmann

SELECTION OF SUITABLE PARTS

Advised parts

				
Washers	Hose clamps	Panels	Metrical threaded bolts >M16	Metrical threaded bolts M2-M16
				
Non metrical threaded parts	Clips	Stamped parts	Nuts	Pipes and tubes
				
Rivets	Springs
