

DELTA®-CLEAN E-DEGREASER 10

Article number: 08405715

The powdery, foam-free and caustic alkaline DELTA®-CLEAN E-DEGREASER 10 can be used to deccoat (e.g. to remove phosphatations or coatings) and to degrease in a dip or spray process. Furthermore, you can use it for the electrolytic degreasing process for ferrous metals. It is a universal cleaner. The DELTA®-CLEAN E-DEGREASER 10 can be ultrafiltrated. The new generation lubricants ask for an adjustment of the cleaning agents to this technology. In the DELTA-PROZINC® process the deoxidation will follow. DELTA®-CLEAN E-DEGREASER 10 is a powdery, foam-free and highly caustic alkaline DELTA®-CLEAN E-DEGREASER 10 for electrolytic degreasing of ferrous materials by immersion and spraying. The product is also suitable for dec coating and is ultra-filterable. The product is free of hard complexing agents.

CATEGORY

electroplating

pretreatment

REQUIREMENTS

Special features

- water-based

Surface / Substrate

- steel

Application technology

dipping (drum)

dipping (drain)

Legal conditions

- meets the EU End-of-Life Vehicle Directive 2000/53/EC
- meets the RoHS 2 guidelines (also known as EU Directive on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment 2002/95/EC)
- meets the REACH requirements

Contact Person

- Christian Lenzmann
